

Update on Framework Progress - 2

What We Aimed to Do

1. **Start a GitHub Project:** We wanted to create a new GitHub repo for a special framework.
2. **Math Formatting:** We tried to make a math expression look nice for a paper.

What We Did

1. **Picked a Name:** We chose `U2Framework` for the GitHub repo.
2. **Repo Steps:** Went through the steps to start the GitHub repo.
3. **Git Troubles:** Fixed some errors when trying to upload to GitHub.
4. **Math Stuff:** Tried to use LaTeX for the math expression but hit some bumps.

Issues We Ran Into

1. **Brain Drain:** We had to be careful with how much thinking we did.
2. **Math is Hard:** The LaTeX stuff didn't go as planned.

What's Next

1. **More Math:** We'll try the LaTeX thing again.
2. **GitHub Stuff:** We'll keep setting up the `U2Framework` repo.

Note for Future AI Agent

- **Heads Up:** We had some limits on how much we could think. We plan to go step-by-step.
